Trans. of A[kademiya] N[auk] SSSR. O[tdeleniye]
 T[ekhnicheskikh] N[auk]. Izv[estiya] 1957, no. 10,
 p. 3-5.

Preceding tension (torsion) has no effect on subsequent
 tension (torsion). Preceding tension (torsion) does not
 strengthen the material for subsequent tension
 (torsion). In experiments on simultaneous tension and
 torsion the strengthening effect of the preceding test
 is achieved when the parameter λ in the subsequent
 test changes insignificantly. Under variable loads the
 proportionality between deviations in stresses and
 deformations is violated. (Author)
